AEM Developer

L&T Infotech, Pune

Jan 2021 - May 2023

- Developed and managed content within the AEM platform, creating custom-built components and templates for enhanced reusability and efficiency.
- Extensively utilized dispatcher to implement security patches and fixes.
- Achieved seamless integration of multiple Adobe products with AEM Cloud, improving system functionality.

- Designed and implemented custom components and templates, addressing specific business use cases.
- Collaborated closely with UI/UX teams and content authors to translate requirements into robust technical solutions.
- Conducted Java upgrades and implemented dispatcher security changes to enhance system security.
- Configured and managed AEM authoring and publishing environments, ensuring optimal performance.
- Developed and leveraged content fragments, experience fragments, and tag managers to streamline content creation.
- Implemented SEO best practices and optimized web content for better search engine performance.
- Demonstrated meticulous attention to detail and commitment to delivering accurate, high-quality work within deadlines.

Project: Mercer

- Created and managed AEM templates and custom components to meet Mercer’s specific needs for content management and page development.
- Led the development of multi-site management (MSM) for multiple regional sites, ensuring localization and consistency across languages.
- Implemented workflow automation for DAM, reducing content creation time by 20%.
- Collaborated with frontend teams to ensure smooth integration with existing CMS systems and optimized AEM for faster load times.

Project: Guycarpenter

- **Optimized Dispatcher Caching:** Configured caching rules to improve website performance by setting up appropriate cache-control headers, cache flushing rules, and optimizing cache invalidation processes for both dynamic and static content.
- **Security Enhancements:** Implemented security best practices for the AEM Dispatcher, such as blocking vulnerable URLs, setting up access control mechanisms (filter rules), and protecting AEM author instances from unauthorized access.
- **Security Patching:** Regularly applied dispatcher security patches and updates, ensuring compliance with AEM security advisories and eliminating vulnerabilities.
- **Component and Template Development:** creation of custom AEM components, templates, and enhancements.
- **Bug Fixes and Content Authoring Support:** Help resolve issues and provide technical assistance to content authors, ensuring smooth workflows.

Configured and managed:

AEM environments (authoring and publish)

Developed and utilized:

Content Fragments, Experience Fragments and Tag manager.

Analyzed, designed and developed:

New pages, Templates, Components, Sling models, Services, and Workflows with custom process steps.

Efficiently Worked on:

Templates and policies, OSGi services, Servlets, Query Builder, Junit5, AEM Mocks,

Experienced in:

Content authoring and restructuring of DAM system, SEO best practices for AEM, Dispatcher configurations.
